

# ShurTuff® Durable Mailers

Tough, Economical Polyolefin Mailers  
Engineered to Endure Shipping Stress.

**Sealed Air Corporation**

# ShurTuff® Durable Mailers

A Unique Coextruded Manufacturing Process Produces Tougher, Lighter Mailers that are Easier to Use and Offer Many Customized Benefits

## ShurTuff® Durable Mailers Ensure that Your Contents Arrive in Perfect Condition

- Highly resistant to tearing and punctures.
- Water-resistant to protect contents from the elements.
- Multi-layer, coextruded material provides complete opaqueness which assures security of contents.
- No lint or dust fibers to contaminate contents.

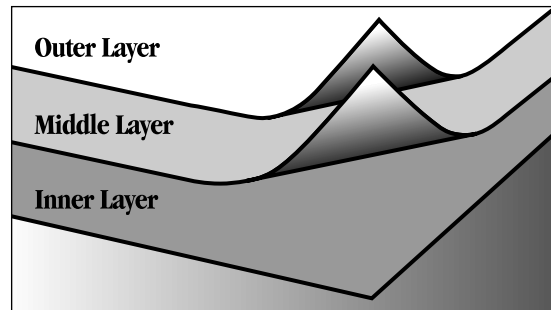

ShurTuff® durable mailers can be overstuffed without bursting.

Contents are protected from the elements.

Scientifically engineered to provide superior tear and puncture resistance.

**Outer Layer** provides a superb matte surface for printing, handwriting and easy label application, including water-activated gum labels.

**Middle Layer** is a proprietary formulation of plastics which produces balanced properties for puncture and tear resistance.

**Inner Layer** is smooth for product insertion, and offers optimum sealability and opacity.

**Triple-layer coextruded polyolefin film** - lighter than paper, stronger than paper and single-layer films.

**Perforated strip** allows for easy opening by recipient.

**Self sealing closure with tamper-resistant seal** keeps contents secure – optional second self-sealing strip is available for reusability/return mail.

**High strength welded seams** resist bursting and allow for overstuffing of contents – no need for expensive gussets.

**Specially treated surface** provides a textured, paper-like quality.

Every ounce counts.  
ShurTuff® mailers  
reduce postage costs  
versus paper envelopes.

Can be used as a lower-cost alternative to labor-intensive cartons.

## ShurTuff® Durable Mailers with Custom Graphics Improve Your Company Image and Add Impact to Promotional Campaigns

- ShurTuff® mailers can be ordered with your company logo or specialized graphics.
- High quality matte white surface is ideal for color printing. Other custom colored surfaces are available.
- Flexographic printing process accommodates graphic designs using up to six colors of your choice.

Also available for a wide range of non-mail applications.

## ShurTuff® Durable Mailers Offer Better Cost, Space and Environmental Efficiency

- Lighter weight ShurTuff® mailers reduce postage cost.
- Compact ShurTuff® mailers are conveniently packed to reduce storage space requirements.
- ShurTuff® mailers can be used as a lower-cost alternative to more expensive packaging such as Tyvek® envelopes and labor-intensive cartons.
- Available with dual self-seal strip for re-use.
- Can be recycled where facilities exist. Ask about recycling containers and Sealed Air's recycling centers.
- Thin coextruded film takes up minimal landfill space and produces no harmful toxins.

## ShurTuff® Durable Mailer Applications
